SUMMARY

Operations professional with 4+ years of experience spanning startup operations, project management, international logistics, and data analysis. Joined an early-stage company as one of its first team members and built its operational backbone from the ground up — processes, documentation, training, reporting, and internal systems that replaced manual workflows with a scalable digital operation. Comfortable owning ambiguous projects end-to-end with limited direction, switching between strategic planning and hands-on execution, and jumping into whatever needs to get done.

EXPERIENCE

Implementation Lead — PARCOVO · Denver, CO Jun 2025 – Present

- Owned end-to-end execution of a company-wide operational overhaul for a services agency with 117 clients and 126 field staff — from stakeholder discovery and workflow analysis through system configuration, staff training, and go-live — replacing manual processes with a centralized digital platform.
- Built and launched 22 operational modules (authorization tracking, credentialing, real-time supervisory reporting), reaching 100% adoption across daily staff with zero support escalations.
- Created scalable systems and documentation, including a reusable onboarding playbook engineered so future teams can stand up the same operation without reinventing it.
- Acted as primary liaison between leadership, frontline staff, and technical development; translated business problems into project plans and roadmaps, and tracked initiatives from concept to completion.

Product Researcher & Operations Strategist — CHCS Ltd. · Denver, CO Mar 2025 – Present

- Embedded in day-to-day agency operations to identify and document gaps across authorization, credentialing, and operational workflows; converted findings into process redesigns and a risk-prioritized, scalable operations framework.

Growth PM & Sales Operations Manager — Autocom Japan Inc · Mongolia Sep 2020 – Mar 2022

- Standardized onboarding and training processes for 20 international accounts across Caribbean and African markets, cutting client ramp-up time by ~30% and improving long-term retention.
- Managed cross-functional handoffs between operations, sales, and regional leadership; monitored onboarding KPIs and delivered weekly milestone reports to the executive team.

Logistics & Compliance Coordinator — Kaneyama LLC · Mongolia Jun 2018 – Sep 2020

- Coordinated international export logistics and vendor relationships as a trilingual liaison (English, Mongolian, Japanese); owned revenue cycle reporting and time-sensitive compliance documentation for international authorities.

CORE SKILLS

Operations & Process: Process design and improvement, SOPs and documentation, vendor management, logistics coordination, compliance workflows

Project Management: Project planning, milestone tracking, cross-functional coordination, KPI/OKR definition and reporting, stakeholder management

Data & Analysis: Microsoft Excel, Google Sheets, SQL (PostgreSQL), reporting and dashboards, workflow analysis

Technical Edge: Python, REST APIs, AWS, Docker, Git, AI workflow automation — able to build internal tools and automations when off-the-shelf software isn't enough

Languages: English (fluent) · Mongolian (native) · Japanese (intermediate)

EDUCATION

M.S. Information Technology Management · Colorado State University 2025 – 2027 (in progress)

Prerequisite MIS Coursework toward MSITM · Columbia College, Denver, CO 2022 – 2025

B.A. in Education · University of the Humanities, Mongolia 2014 – 2018
