

ARIUNZAYA BAASANJARGAL

Product Manager · Home Care SaaS · HIPAA-Compliant Systems
rn.zaya019@gmail.com · 720-384-9848 · ariune.com · linkedin.com/in/ariunzaya-baasanjargal
Colorado, USA · U.S. Permanent Resident · Trilingual: English · Mongolian · Japanese

SUMMARY

Product manager and home care domain expert who built a HIPAA-compliant SaaS platform from zero to production — 22 feature modules, 38 schema migrations, deployed to a live home care agency after 10 months of direct operational immersion in the same workflows the software solves. Trilingual background spanning international logistics, team leadership, and healthcare compliance. Pursuing M.S. Information Technology Management at CSU Global. Brings domain fluency that most PMs take years to acquire.

CORE COMPETENCIES

Product Management

Roadmaps & Prioritization
Customer & Prospect Discovery
Product Requirements (PRDs)
Go-to-Market Planning
Stakeholder Alignment
Adoption & Outcome Metrics

Domain & Compliance

Home Care Operations
Prior Authorization (PAR) Workflows
HIPAA Technical & Privacy Safeguards
Medicaid ID & Caregiver Credentialing
Multi-tenant SaaS / EVV Context

Tools & Technical

Notion · Git · REST APIs · SQL
Python · FastAPI · React · TypeScr
PostgreSQL · Docker
AI: Claude Code · Cursor · ChatGP
Google PM Cert (2026)
HIPAA Privacy & Security Certified

EXPERIENCE

Founder & Product Manager · Ariune LLC — Colorado

Jan 2026 – Present

LLC incorporated March 2026 · Product development began January 2026

- Identified prior authorization tracking, caregiver credentialing, and supervisory visit scheduling as the highest-friction home care workflows through 10 months of direct operational immersion before writing a single line of code.
- Owned full product lifecycle for PARCOVO: discovery → prioritization → PRDs → delivery → iteration; shipped 22 feature modules across 3 months into production at a live agency (CHCS), used daily by operations staff.
- Defined HIPAA technical safeguard requirements: PHI encryption (AES-256), audit logging on all CRUD/view events, RBAC, MFA, and multi-tenant data isolation; reduced PAR paperwork processing time by ~60%.
- Leveraged AI tools (Claude Code, Cursor, ChatGPT) throughout shaping, spec drafting, and rapid prototyping to compress feedback cycles — paired with judgment on when human insight is essential.

Operations & Domain Expert · Complex Home Care Solutions — Colorado

Mar 2025 – Present

- Embedded in daily home care operations: PAR workflows, Medicaid documentation, caregiver scheduling, and compliance tracking — operational context driving all PARCOVO product decisions.
- Managed IT systems, vendor relationships, and technology procurement; created org-wide SOPs and led staff onboarding on new systems.

Team Manager · Autocom Japan Inc — Ulaanbaatar, Mongolia

Sep 2020 – Mar 2022

- Led 4-person sales team; defined KPIs, built performance dashboards, developed training programs that reduced ramp-up time for new hires.

Logistics Coordinator · Kaneyama LLC — Ulaanbaatar, Mongolia

Jun 2018 – Aug 2021

- Coordinated end-to-end import logistics with 100% compliance record across all regulatory filings over 3 years; trilingual liaison (Japanese–Mongolian–English) across international suppliers and customs authorities.

PRODUCT PORTFOLIO

PARCOVO — Home Care Operations Platform

[rnzaya019-maker.github.io/PAR_Vault_Demo](https://github.com/rnzaya019/par_vault_demo)

Stack: Python · FastAPI · React · TypeScript · PostgreSQL · Docker

HIPAA-compliant home care SaaS: authorization tracking, caregiver credential management, care plan scheduling, document management with versioned PDF storage, multi-type notes timeline, and audit logging across all actions. 22 modules shipped in 3 months. In daily use at a live home care agency.
