ARIUNZAYA BAASANJARGAL

Operations Coordinator | Process Improvement & Documentation

Littleton, CO | 720-384-9848 | ariune.career@gmail.com | ariune.com | linkedin.com/in/ariunzaya-baasanjargal

PROFESSIONAL SUMMARY

Operations and process coordination professional who converts inconsistent workflows into clear documentation, measurable process improvements, and smoother daily operations. Delivers end-to-end workflow mapping, SOP writing, user training, and software rollout and go-live support, coordinating across cross-functional teams, clients, and partners to keep operations accurate and on track. Builds lightweight internal tools using AI-assisted development to close process gaps and improve data accuracy. Experience spans home care, international sales and logistics, and small-business operations, with daily use of Microsoft Office and Google Workspace.

CORE SKILLS

Process Mapping & Workflow Improvement | Standard Operating Procedures (SOPs) | Cross-Functional & Stakeholder Coordination | Documentation Management & Technical Writing | Data Accuracy & Quality Assurance | Software Rollout, Training & Go-Live Support | User Acceptance Testing (UAT) | Microsoft Office (Excel, Word, Outlook) | Google Workspace (Gmail, Sheets, Docs, Drive) | Reporting & Basic SQL

EXPERIENCE

Complex Home Care Solution | Care Coordinator

Denver, CO | Oct 2025 - Sep 2026 | Role scope included workflow analysis, software implementation, and operations coordination

- Eliminated a 30-45 minute paper caregiver application process by designing and rolling out a multilingual digital workflow, cutting illegible submissions and duplicate data entry while processing more than 60 completed applications accurately from day one.
- Drove requirements gathering, test scenario design, user acceptance testing, training, and go-live support for an internal operations platform, delivering a stable rollout that now supports daily work for nearly 200 clients and nearly 200 caregivers.
- Mapped end-to-end onboarding, care-plan, scheduling, and prior-authorization workflows into clear requirements and SOPs, standardizing procedures adopted across caregiver and client-facing teams.
- Coordinated care plans, schedules, and documentation across caregivers, clients, case managers, and families, converting frontline feedback into measurable process and system improvements.

SELECTED PROJECTS

Parcovo (Home Care Operations Platform) | Requirements, Testing & Rollout Leadership

2026 | Internal operations system now used daily by Complex Home Care Solution

- Led requirements definition, test scenario design, and rollout support for an internal operations system spanning client records, scheduling, and documentation, taking it from concept to daily use and sustained adoption across the organization's clients and caregivers.

EARLIER EXPERIENCE

Autocom Japan Inc. | Sales Operations Coordinator

Ulaanbaatar, Mongolia | Sep 2020 - Mar 2022

- Managed requirements, bids, payments, and shipment tracking for 23 dealer clients across African, Caribbean, and UK markets, sustaining throughput of about 60 vehicles per month.
- Standardized onboarding and training procedures for about 30 staff and two branch managers, and built Excel reporting systems to track leads, bids, pricing, and team performance.

Kaneyama LLC | Logistics and Operations Coordinator

Ulaanbaatar, Mongolia | Jun 2017 - Sep 2020

- Eliminated error-prone paper recordkeeping by implementing structured trackers and standardized documentation for about 18 annual container shipments, ensuring reliable purchasing, invoice, and customs records.
